OBJECT ORIENTED PROGRAMMING WITH JAVA

Time Allotted : 3 Hours

Full Marks : 70

The figures in the margin indicate full marks.

*Candidates are required to give their answers in their own words
as far as practicable.*

GROUP – A

(Multiple Choice Type Questions)

1. Choose the correct alternatives for the following : $10 \times 1 = 10$

i) String $s = "s"$;

`System.out.println (s) ;`

The output is

a) s

b) $"s"$

c) Compile error

d) Run time error.

ii) Consider the following statements :

`int a = 3, b = 2 ;`

`a = (a < b) ? (a + b) : (a - b);`

What will be the output of a ?

a) 5

b) $- 1$

c) 1

d) $3.$

GROUP – B

(Short Answer Type Questions)

Answer any *three* of the following. $3 \times 5 = 15$

2. Explain method overloading and method overriding with the help of an example.
3. What do you mean by interface ? Write the difference between interface and abstract class.
4. “Objects are passed by reference in java.” Explain with example.
5. What is “dynamic method dispatch” ? How is it accomplished ?
6. What is difference between ‘default and public’ modifier and ‘protected and private’ access modifier ?

GROUP – C

(Long Answer Type Questions)

Answer any *three* of the following. $3 \times 15 = 45$

7.
 - a) What is the significance of final keyword used as a modifier before a variable ? How is it used for a method or a class ? Can an abstract method be declared as final ? $2 + 2 + 1$
 - b) Explain about ‘this’ keyword. Illustrate with a suitable example. $2 + 2$
 - c) What are the differences between private and static modifiers while used in classes ? 2
 - d) What is the purpose of finalization ? Can we have more than one constructor in a class ? If yes, explain the need of such situation. $2 + 1 + 1$
8.
 - a) What is multithreading ? Is it synonymous with multiprocessing ? $2 + 1$
 - b) What is a thread ? How is it different from a process ? $1 + 2$
 - c) In how many ways a thread can be created ? Illustrate the pros and cons of the different ways of creating a thread. $2 + 2$
 - d) Discuss the following functions with example : 5
 - i) run ()
 - ii) suspend ()
 - iii) setPriorities ()

- 9. a) What is the purpose of Runnable Interface ? What is the collection interface ? Illustrate its usage. 2 + 1 + 2
- b) What is the difference between String & StringBuffer ? 3
- c) Write a Java program to add two strings using string buffer. 3
- d) What is a wrapper class ? Illustrate through example. Is String a wrapper class ? 2 + 2
- 10. a) Illustrate the use of serialization and deserialization. 3
- b) What is abstract base class ? What is concrete derive class ? Can there be an abstract class with no abstract methods in it ? 1 + 1 + 1
- c) Does Java support static or dynamic binding ? Explain. 2
- d) What is aggregation ? How is aggregation different from association and generalization ? 1 + 2
- e) Write a program in Java that demonstrates a three level inheritance. Use the various access controls for the same. 4
- 11. a) What is the difference between procedural programming paradigm and object oriented paradigm ? 2
- b) Explain the Java compilation and execution of Java programming steps. 2
- c) What is the role of JVM ? Is JRE different from JVM ? 2 + 2
- d) What do you mean by automatic garbage collection in Java ? 2
- e) What is use of finally clause in exception handling ? When is the finally clause of a try-catch-finally statement executed ? Illustrate through example. 2 + 3
