2012**

BIOCHEMISTRY (GENERAL & OCULAR)

Time Allotted : 3 Hours

Full Marks : 70

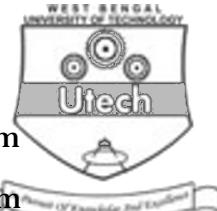

The figures in the margin indicate full marks.

*Candidates are required to give their answers in their own words
as far as practicable.*

GROUP - A
(Multiple Choice Type Questions)

1. Choose the correct alternatives for the following : $10 \times 1 = 10$

- i) Phospholipid is a
 - a) simple lipid
 - b) complex lipid
 - c) derived lipid
 - d) neutral lipid.
- ii) All hormones are secreted from anterior pituitary except
 - a) growth hormone
 - b) vasopressin
 - c) ACTH
 - d) LH.
- iii) Albumin is synthesized in
 - a) stomach
 - b) liver
 - c) pancreas
 - d) duodenum.

- iv) Average thickness of tear film varies from
- a) 1 - 3 μm
 - b) 6 - 8 μm
 - c) 2 - 3 μm
 - d) 4 - 8 μm .
- v) Deficiency of EFA leads to
- a) colour blindness
 - b) phrynoderma
 - c) night blindness
 - d) pelagra.
- vi) End product of protein is
- a) fat
 - b) carbohydrate
 - c) amino acids
 - d) none of these.
- vii) ACTH is secreted from
- a) liver
 - b) parathyroid gland
 - c) pituitary gland
 - d) thyroid gland.
- viii) Hormone that lowers cAMP concentration in liver cell is
- a) Glucagon
 - b) Insulin
 - c) Epinephrine
 - d) Thyroxine.
- ix) The co-enzyme of transaminase required for transamination is
- a) NADP
 - b) NADH
 - c) cAMP
 - d) PLP.
- x) The number of ATPs obtained by complete oxidation of glucose is
- a) 36
 - b) 42
 - c) 38
 - d) 48.

CS/B.OPTM/SEM-1/BO-104/2012-13

GROUP - B

(Short Answer Type Questions)

Write short notes on any *three* of the following.

$$3 \times 5 = 15$$

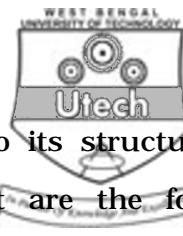

2. Test for tear film adequacy.
3. Beta oxidation of fatty acids
4. Oestrogen
5. Transamination and deamination
6. Insulin
7. Definition and classification of protein.

GROUP - C

(Long Answer Type Questions)

Answer any *three* of the following. $3 \times 15 = 45$

8. Discuss the factors affecting enzyme activity. What do you mean by reversible and irreversible enzyme inhibition ? $8 + 7$
9. Describe sources, importance and clinical features of Vitamin A deficiency. $5 + 10$
10. Describe the bio-chemical composition of cornea. How does cornea get its nutrition ? What is the role of HMP shunt in corneal metabolism ? $8 + 4 + 3$

CS/B.OPTM/SEM-1/BO-104/2012-13

11. Define protein. Classify protein according to its structure.

What are essential amino acids ? What are the four structures of protein ? Discuss the major functions of protein.

$2 + 3 + 2 + 3 + 5$

12. Describe the process of citric acid cycle. Mention the three main regulatory enzymes of TCA cycle. Discuss the significance of pentose cycle.

$8 + 3 + 4$
