

Name :

Roll No. :

Invigilator's Signature :

**CS/B. Pharm (NEW)/SEM-3/CS-303/2009-10
2009**

**BASIC ELECTRONICS &
COMPUTER APPLICATIONS**

Time Allotted : 3 Hours

Full Marks : 70

The figures in the margin indicate full marks.

*Candidates are required to give their answers in their own words
as far as practicable.*

**GROUP – A
(Multiple Choice Type Questions)**

1. Choose the correct alternatives of the following : $10 \times 1 = 10$

- i) 'Driver' is an example of
 - a) application software b) system software
 - c) hardware d) none of these.

- ii) UNIX is a
 - a) single user operating system
 - b) multi user operating system
 - c) batched operating system
 - d) distributed operating system.

- iii) Binary 10101.11 is equivalent to decimal
a) 21 b) 21.75
c) 21.0 d) 75.21.

iv) `printf("%d ", 4/2%2);` will print
a) 4 b) ∞
c) 0 d) -4.

v) In C language 'division by zero' is a
a) compile time error b) run time error
c) not an error d) none of these.

vi) 2's complement of 10000010 is
a) 01111101 b) 10000011
c) 01111110 d) 11111110.

vii) Two input XOR gate is equivalent to
a) $AB + A' B'$ b) $A' B + AB'$
c) $AB + (AB)'$ d) $(A + B) + (A + B)'$.

viii) A 32 bit microprocessor has the word length equal to
a) 2 bytes b) 1 byte
c) 4 bytes d) 8 bytes.

ix) A Do-While loop is useful when we want that the statements within the loop must be executed
a) only once b) at least once
c) more than once d) none of these.

GROUP – B
(Short Answer Type Questions)

Answer any *three* of the following. $3 \times 5 = 15$

2. a) What is the difference between interpreter and compiler ? 2

b) What are the important tasks performed by an operating system ? 3

3. a) What are local variable and global variable ? Explain with example. 3

b) What will be the output for the following program segment ?

```
void main ( )
{
    int x = 10, y = 5, p, q ;
    p = x > 9 ;
    q = x > 3 && y != 3) ;
    printf ("%d\n %d", p, q ) ;
}
```

CS/B. Pharm (NEW)/SEM-3/CS-303/2009-10

4. a) What do you mean by universal gate ? Give example. 2
b) Prove that $x + 1 = 1$. 2
c) Write the truth table for NAND gate. 1
5. Write a C program to calculate the mean of n numerical values stored in an array.
6. a) What is recursion ? Explain with an example.
b) What is ternary operator ?

GROUP – C
(Long Answer Type Questions)
Answer any *three* of the following. $3 \times 15 = 45$

7. a) Explain the following operators with example : 4
i) Modulo division operator
ii) Conditional operator.
- b) Write a program in C to calculate the factorial of a number using function. Your program should display appropriate error message for invalid input. 4
- c) Convert decimal 73 to equivalent octal and hexadecimal number. 3
- d) What is distributed operating system ? 2

CS/B. Pharm (NEW)/SEM-3/CS-303/2009-10

- e) What are the rules to be followed to construct a variable name ? 2

8. a) What are the limitations of switch ... case statement ? 2

- b) What will be the output for the following program segment : 3

i) int i = 3;

printf ("%d", i++ + ++i);

ii) int i = - 4, j, num = 10 ;

j = i % - 3 ;

j = (j ? 0 : num * num);

printf ("j = %d", j);

iii) int x = 3;

x* = x + 4

printf ("X = %d", x);

- c) Write a program in C to implement standard deviation. 4

- d) Draw a logic diagram for the following function : 2

$$F = \overline{A \cdot B} + C \cdot D + \overline{E \cdot F}$$

- e) What is multi programming ? Write a note on 'multi processor system'. 2 + 2

CS/B. Pharm (NEW)/SEM-3/CS-303/2009-10

3 + 5

9. a) State and prove D'Morgan's Laws and Boolean Algebra.

Design a Half Adder circuit.

b) Consider the program fragment :

```
int i = 5, j = 0, k = 0;
```

```
j = i ++;
```

```
k = i;
```

```
printf ("%d\t%d\t%d", j++, --i, k+1);
```

```
printf ("%d\t%d\t%d", j, i, k);
```

What are the outputs of the print statements ? What do you mean by arguments and return values of a function ?

3 + 4

10. a) Simplify the following expressions :

5

$$y + x.y.c.d + x'.y.c.d + x'.y.c'.d + x.y.c.d'$$

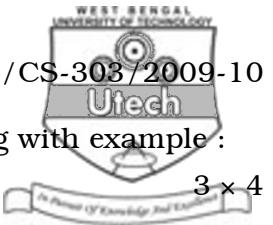

b) Prove or disprove by using a truth table :

5

$$x.y + x.z = x. (y + z)$$

c) Realize AND gate and NOR gate using only NAND gate.

5

CS/B. Pharm (NEW)/SEM-3/CS-303/2009-10

11. a) Write notes on any *four* of the following with example :

- i) Artificial intelligence
- ii) Call by value and call by reference
- iii) Pointer to a pointer
- iv) Structure pointer
- v) Distributive law
- vi) Type casting in C.

b) To open a file, what is the difference between “r” and
“+ r” mode ?

3
